Underground mining

Golynskaya F.A. The angle of incidence of the coal seam as a factor spontaneous coal ............ 5
Korchak P.A., Zhukova S.A. Method of receiving basic data for the seismic monitoring at underground mines of JSC «Apatit» ................................................................. 15
Pavlov A.M., Semenov Yu.M. SOSnovskii L.I. Evaluation of parameters of stable pillars and room roofs in underlay lode mining in cryogenic zones in terms of the irokindsinsky gold deposit ........................................................................................................ 21
Chernyshov A.V. Roof rock behavior in interaction with protective structures ................. 28

Open-cast

Bilin A.L. Open pit boundaries determination method ........................................................................... 36
Zhigulskiy M.A., Shpynev V.M. Complex equipment for applying bituminous emulsion macadam on a pile of milled peat for fire ................................................................. 44
Laptev Yu.V., Titov R.S. Optimisation of parametres of is material-industrial stocks of an open-cast mine in a mode of a sustainable development of the mountain enterprise ....................................................... 49
Panishev S.V., Kaimonov M.V., Kozlov D.S., Maximov M.S. Recommendations for dragline working with exploded permafrost .................................................................................. 66
Simonenko V.I., Mostyka A.V., Gricenko L.S. Organization of putting into operation of before operating quarries on open-cast of macadam raw material at proceeding in their work in new economic terms ............................................................................... 72
Kalybekov T., Baigurin Zh.D., Rysbekov K.B., Toleuov B.T. Development of process flow diagrams for selective external dumping, considering reclamaiton ........... 78

Building of underground constructions and mines

Samedov A.M., Tkach D.V. Rheological model of slightly overmoistured clay soil after its stabilization by active hydraulic binding substances .......................................................... 82
Khasanov N.M., Bobobekov O.K. Processing technology efficiency in Chormagzak tunnel driving in the Republic of Tadzhikistan ............................................. 88

Enrichment of minerals

Levenets O.O. Bioleaching of Co-Cu-Ni ore by solution of ferric iron prepared biologically and chemically .............................................................................................................. 94
Lizunkin V.M., Morozov A.A., Gavrilo A.A., Lizunkin I.V. Laboratory research of uranium leaching in ultrasound-activated sulfuric solutions ........................................... 100
L’vov E.S., Matveev A.I. Studying the formation of particle size distribution and disclosure of minerals in ore crushing mill using multiple dynamic action DCD-300 ................................................................................................. 112
Ul’yanov V.G., Pakhomov N.E. Develop a system for automatic operation control of the process of gravitational separation in pneumatic jigs ........................................... 117
Fedoseev S.M., Sleptsova E.S., Matveev A.I., Monastyrev A.M. On the issue of enrichment of gold concentrates containing magnetic minerals ........................................... 123
Mining cars, the equipment and transport
Gabov V.V., Zadkov D.A., Lykov Yu.V., Kustrikov E.V. Performance assessment of selective-action front-end modular equipment systems .................................................. 129
Drizhenko A.Yu. Development of open pit mining-and-transportation system theory ...... 134

Measuring, control, diagnostics
Efimenko S.A., Portnov V.S., Tursunbaeva A.K., Mausymbaeva A.D. X-ray radiometricalic approbation of copper ores of kazakhstan deposits .......................................... 143
Rahimov V.R., Kazakov A.N. Finite element analysis of stress–strain state of rocks, considering tectonic stresses .................................................................................... 151

Physics of rocks and processes
Bolikov V.E., Rybak S.A., Ozornin I.L. Shaft sinking in rock mass under the action of tectonic stresses...................................................................................................... 163
Matveev A.I., Lebedev I.F., Nikol’kova L.V., Yakovlev B.V. Modeling of motion of particles in the screwed version of air sepatatore.................................................. 172
Matveev I.A., Matveev A.I., Yeremeyeva N.G., Filippov V.E. Model of particle motion in upstream along the curved surface...................................................................................... 179
Suknev S.V. Determination of the static modulus of elasticity and Poisson’s ratio of the rocks under specimen temperature variation ............................................................................................................. 183
Matveev A.I. The researching of the process of washing clay sands in a machine of disintegration and classification ................................................................................................. 189

Aerology, methane, safety
Zedgenizov D.V., Tarasov E.V. Calculation of regulator control system of air distribution in the subway station using the method separation of motions ........................................ 194
Kobylin A.S. Analysis of distribution of harmful gases in mine roadways using computer modeling.................................................................................................................. 202

Markshadering
Usanov S.V. Monitoring of geodynamic movements of rocks under large-scale complicated mining impact in the vysokogorsky iron ore mine ............................................................... 208

Explosive works
Bel’chenko E.L., Solov’ev V.O., Shvedov I.M. Prospects of use of portable explosive reactive complexes in development of gold deposits of the far east region ............. 214
Strilets A.P., Shvets V.Yu., Gopanyuk D.G. Experience gained by the national mining university in dealing with problems associated with blasting ............................................. 220

Mathematical and computer modeling
Asadov A.R. Analisys and specific processing of digital terrain model of Central Kyzykum .... 228
Postnikov V.I., Tkach V.R., Agafonova A.B., Mitroshin E.N. Econometric models basic parameters optimization technological structure mine-lava .................... 233
Sleptsova E.S., Matveev A.I., Nikol’kova L.V., Yakovlev B.V. Mathematical modeling of the concentration of heavy particles in the bed jig .......................................................... 239
Tsekhanovich O.M., Chekmareva V.A. 3D modeling and visualization of history and regional ethnography museum in mining district ........................................... 246
Economics and management

Agafonov A.U. Possible scenarios of development of small business in the Russian Federation .......................................................... 253

Bodnaruk N.M. Analysis of ecological-and-economic problems in lignite coal mining......... 261

El’chaninov E.A., Konnov V.I. Control method for water flow rate and suspended solid concentration in offtake channels in gold placer mining in the East Transbaikalia ................................................... 267

El’chaninov E.A., Konnov V.I. Development of allowable discharge standards considering hydrological characteristics of small rivers during gold placer mining in the East Transbaikalia ....................................................... 273

Kainov A.I. Improvement of mine expansion planning (in terms of the Tugnuisky Open Pit Mine) .......................................................... 279

Kostyuk I.S., Golubeva N.M. Analysis of the content and structure of production potential of a coal mine ........................................ 288

Fedorkevich T.I., Kashirina S.N., Trofimova I.D., Zakharov S.I. Connection of work and salary of maintenance personnel ...................... 296

Electrification mining enterprise

Bakirov A.R., Kutyrev A.E. A design of analysis method of energy efficiency for electrochemical protection system of buried ........................................ 302

Skitchenko K.V., Bakirov A.R. Development of power supply system of underground mines on the basis of high-reliable switchgear ..................................................... 309

Automation and information systems

Klebanov A.F. Development of principles of integrated information system and its interaction with the «Karier» dispatch control system ..................................................... 314

Kozlov V.V. Analysis of experience of development of the intellectual technological systems ..................................................................................... 321

Kostin V.N., Volkova L.P. Elaboration of the intellectual program for aplane machine SAPR ........................................................................ 326

Oganesyan A.S., Agafonov V.V. Generalized algorithm of performance evaluation, monitoring and control for process flow diagrams in coal mines ........................................... 331

Polyanskiy P.V., Timoshenko D.P. Reliability of processing activity automated control system based on the software-and-engineering system Tekon .............................................. 337

Technology

Kumakhov A.A., Bolotokov A.A. Polycapillary x-ray lenses and their use in material science ........................................................................................................ 356

Works of young scientists

Agafonov V.V., Sushchev R.A. Principles of a substantiation of technologies of working off coal sites of a difficult configuration with the limited stocs of coal ............ 363

Anikin K.V. A study of correlation shovels productivity, dipper capacity, work front length, and bench width .................................................................................. 366

Antonov M.A., Agafonov V.V., Ageikin A.V. Synthesis of spatial topology (structure) of mine roadways in process flow diagrams for coal mines ........................................... 370

Bul’bashev A.A. Choice of type explosive in conditions of afanasevsky deposit .................. 376
Kozlov A.A. Backing up data in sensor networks using clustering................................. 380
Kubasov V.V. New technologies for enhancing efficiency of a diamond rock-cutting tool .......................................................................................................................... 383
Morgachev K.V. The implementation of the mathematical apparatus of model uncertainty by combining active set ........................................................................................................ 388
Nikolaev P.V. Improved technology artificial ground freezing using solid reagent ........ 392
Senkus V.V. Development recommendation for underground mining in zone of open pit mining ............................................................................................................................ 401
Fedorov A.M. Analysis of production intellectualization problems on the stages of the life cycle of a product ........................................................................................................ 407
Chernikov R.V. Volume data structures and aspects of their use .............................. 412
Shakirova A.Kh. Functional model of small and medium business credit financing .... 416

Preprints
Caplunov D.R., Rilnikova M.V., Radchenko D.N. and other. Terms of stable functioning mineral feed complex of Russia. Issue 1 ...................................................... 391
Lavrentiev A.V., Antoniadi D.G., Savenok O.V., Berezovskiy D.A. Experimental studies of the mechanism of hydrodynamic stability sandstone ......................................... 422

The deposited manuscripts
Efremova E.B. Internal control of the profit tax organization ...................................... 71
