CONTENTS

Underground mining

Gorshkov M.D., Senkus V.V., Senkus V.V. Complex way of development of suites of layers of anticlinal fields .................................................................5
Svyatetskii V.S. Finding shearing stress and strength of paste backfill based on uranium mill tailings .................................................................10
Sokolov I.V., Smirnov A.A., Antipin Yu.G., Baranovsky K.V. The technology of ascending mining a golden ore deposit employing dry filling .............................................14

Enrichment of minerals

Antipenko L.A. Coal foam flotation test method ............................................................20
Boldyrev A.V., Balikov S.V., Gudkov S.S., Yemelianov Yu.E., Bogorodsky A.V. Optimization of process of pressure oxidation-sorption (POXS) of refractory gold bearing concentrates .................................................................34
Dvoychenkova G.P., Timofeev A.S., Chernysheva E.N., Koval'chuk O.E. Experimental validation of electrochemical and physicochemical approaches to stabilization of ferrosilicon suspension parameters ..........................................................41
Draskov V.P. The analysis of peculiarities of development of deformation processes of rocks around stopping zone in Phase 2 program .................................................................49
Shpakov P.S., Dolgonosov V.N., Kaygorodova E.V. Modeling stress–strain state of rocks around stopping zone in Phase 2 program .................................................................59
Karimov I.A., Khakimov K.Zh. Development of the compound structure of uranium mineralization of underground leaching .................................................................67
Konnova N.I. Processing of technogenic raw materials of mining ........................................70
Konnova N.I. Technological assessment of obogatimosti of zoloto-kvarts-karbonatno-go ore of poor and sulphidic type .................................................................74
Konnova N.I. X-ray radiometric separation of sillimanitovy ores .........................................77
Mukhtar A.A., Mukhymbekova M.K., Makashev A.S., Momynebekov A.D., Nuskabekov Zh.S., Kasyanova B.K. Magnetic roasting enrichment of coc-bulak deposit limonite ore ......................................................................................88
Nikolaev A.A., So Tu, Goryachev B.E. Prospect for shale gas production ................................95
Ostrovskaia G.Kh. Experimental validation of EDT-100 emulsion composition elements and mechanism in the circuit of washing of diamond concentrates from fat .................................................106
Ostrovskaia G.Kh., Dvoychenkova G.P., Timofeev A.S. Enhancement of diamond size grade -5 mm recovery in finishing circuits of X-ray fluorescence separation .............................................114

Mining cars, the equipment and transport

Aleksandrov V.I., Kuskil’din R.B. Need for slowdown of lifting vessels in an emergency braking on mine hoist installations .................................................................123
Gorelova A.Yu., Kristal M.G. The Deep Hole Boring Instrument For Hydraulic Legs’ Shell Manufacturing Equipped With Stabilizer .............................................................. 131
Kassikhina E.G. Development of the designing system of multi-purpose steel head-frames for the mines of the new technological level .................................................. 136
Keropyan A.M., Bibikov P.Ya. Interaction mining locomotives traction wheels with rails, depending on the operating conditions ......................................................... 143
Kolosov D.L., Kolosov A.L., Belous E.I. The analysis of the stress state of the band at the operating parameter changes of burden conveyor ........................................ 151
Kosarev N.P., Kopachev V.F. Research adaptive properties of diagonal mine of fans ...... 160
Lyaptev S.A., Potapov V.Va. Regularities of minerals division on the frictional separator inclined plane ........................................................................................................ 166
Potapov V.Ya., Potapov V.V., Konev Ya.I., Semerikov L.A. Results of determining the rolling friction coefficient of rock fragments ...................................................... 171
Samigullin G.Kh., Pystin V.A. Experimental study of necessity to introduce the metal pipe’s stress-strain state during the corrosion monitoring .................................. 176
Slobodyanik T.M., Nikitina O.A. Railroad car dumpers mechanisms force analysis ....... 183
Ugolnikov A.V., Stoizhkov D.S. Rationale for the cost of procurement of dependence section pumps of the height of steps in the multi-stage dewatering .............. 187
Khazin M.L., Volegov S.A. Improvement of reliability of piston-type compressor valve ...... 191
Popov Yu.V., Kudryavtsev S.V., Stepanov S.V. Modernization of the braking system of mine hoist ........................................................................................................ 195

Aerology, methane, safety

Malashkina V.A. Features of thermodynamic processes in underground degasification pipes made of composite materials in coal mines .................................................. 198
Morozov V.N., Kagan A.I., Tatarinov V.N. Geodynamic aspects of radiation safety at archipelag Novaya Zemlya ........................................................................................ 205
Radchenko S.A., Matvienko N.G. Low-cost rapid method for assessing the risk of the gas danger at drilling and tunneling works in coal mines ........................................ 220

Economics and management

Galiev Zh.K., Galieva N.V. Theoretical Aspects of Management at the Mining Enterprises .................................................................................................................. 227
Gorev P.A., Kostikov V.G. Precision navigation system for the control of the open pit mining processes ........................................................................................................ 232
Tsukerman V.A., Goryachevskaya E.S. Economic evaluation of the mining companies of the Russian Arctic ............................................................................................... 236
Kalinin A.R., Vasyukova V. Analysis of the contemporary state of economic and nature-conservation activity at the enterprise «ALROSA» (JSC) .................................. 246
Kirichenko Yu.V., Kashirsky A.S. Hard minerals and use potential of the World ocean ............................................................................................................................... 251
Kotov V.S., Petrakova N.G., Sorokina L.N. Modern taxation of small-size business .... 260
Kulikov M.M. Conception of development of industrial policy in Rostov region ........ 269
Le Binh Duong, Ivatanova N.P., Stoyanova I.A., Yastrebinskii M.A. Ecological and economic assessment of evaluating the effectiveness of innovative technological solutions for the protection of water resources at coal mines ........................................275

Lozovskaya Ya.N., Bogdan I.M. Particularization of the key trends of coal fuel demand stimulation of fuel power station ..................................................................................284

Mikhina T.V., Korobova O.S. Assessment of the economic losses associated with the condition of the injury and working conditions at the enterprises of mining coal, brown coal and peat in the Russian Federation ..................................................................................305

Utkina S.I., Fomina O.A. Research of infringements in area Foreign trade activities realization in the Russian Federation ..........................................................311

Automation and information systems

Mel’nikov E.P., Nozhkina A.V. State-of-the art and problems of diagnostics of precious stones and industrial minerals ..........................................................318

Azarov A.V., Serdyukov A.S., Nikitin A.A. Numerical modeling of microseismic noise in the block-hierarchical heterogeneous environments ..................................328

Khalkechev R.K. Expert control system of scientific researches process of geomaterials destruction of complexity various orders ......................................................336

Khalkechev R.K. Hierarchical and self-similar mathematical models of geomaterials concerning fields of tension as the basis for percolated multifractal modelling of control objects ........................................................................343

Khalkecheva L.K. Methods of identification of competitive structures in organizational systems and management on its basis in social and economic systems by the analogy physical and economical method ..........................................................351

Electrification mining enterprises

Lyachomsky A.V., Petrochenkov A.B., Perfilieva E.N. Conceptual design and engineering of increasing of the energy efficiency .............................................360

Pichuev A.V., Shevyrev Yu.V. Legal regulations on electrical safety in mines in Russia ......365

Geology

Ecology and safety exploration of mineral resources

Shadrunova I.V., Orekhova N.N., Gromov M.E., Stefunko M.S. Algorithm of interactive formation a complex of measures for cleaning industrial waste waters ..........380

Oil and gas

Gudzenko V.T., Varenichev A.A., Gromova M.P. Prospect for shale gas production .....386

Popov M.S., Popov E.M. To the question about the creation of underground gas storage in the conditions of Eastern Donbass ........................................................................392

429
Mathematical modeling

Versilov S.O., Sergeev V.V., Vakhrenko I.V., Shestak S.G. On principles of the economic mathematical models structurization for the productive logistics of the non-ore building materials plants .................................................................399

Works of young scientists

Zhuravlev E.I., Fedotov G.S., Pikel’ K.S. Automated forecast the stress state of the rock mass on the basis of extrapolation characteristics of seismic and seismic acoustic emission using a neural network technologies.............................................404

Petrovykh L.V. Estimate of the energy dependence of the mine pumping systems from excess of pressure ..................................................................................411

Special editions GIAB

Shurygin D.N., Kalinchenko V.M., Shutkova V.V. Theory and methods of geometrization of coal bearing strata as the basis for effective planning of mining operations ...............................................................................................79

Nguyen Duyen Phong Assessment of the impact of geomechanical processes in the construction of tunnels for justification of design parameters lining ........................................350

The deposited manuscripts

Agafonov V.V., Belyaev V.V., Voropaeva E.V., Yeqakov A.V. Multifunctional sotoserena the development of the reserves of coal deposits ........................................327
