Geotechnology (underground, open and construction)

Eremenko V.A. Stress state modeling of coaxial three-level open stoping in Map3D ............5
Melnik V.V., Efimov V.I., Korchagina T.V., etc. Experience of steeply dipping coal seam mining ....................................................................................................................... 18
Reshetnyak S.N., Maksimenko Yu.M. Reinforcement materials for damaged zones in coal–rock mass under mining .......................................................................................... 39
Ulyanova E.V., Vasilkovskiy V.A., Malinnikova O.N. Effect of gas-dynamic phenomena on adsorption properties of coal in Krasnolimanskaya Mine ................................. 46

Geomechanics

Alekseev K.N., Kurilko A.S. Effect of freezing–thawing cycles on strength characteristics of fine-grained dispersely reinforced concrete with basalt fiber ............................. 56

Mine aerogasdynamics

Alferova E.L., Lugín I.V. Generation and maintenance of the required air parameters in subway tunnels during warm seasons ................................................................. 63

Geoecology of mining industry

Goncharenko S.N., Korostelev D.B. Methods and models for integrated estimation of system connection between the nature protection policy efficiency and managerial solutions in the field of use of natural resources ................................................................. 70
Gudzenko V.T., Varenichev A.A., Gromova M.P. Ecological problems of gas hydrates ......... 77
Mikhaylov Yu.V. New subsoil use technologies towards ecological and national security of Russia .................................................................................................................. 92

Mining geophysics

Prudetskiy N.D., Sokolov K.O., Fedorova L.L. Physical modeling of high-frequency electromagnetic wave propagation in rocks with ice-filled fracture ......................... 107
Romanov V.V., Malskiy K.S., Poserenin A.I., etc. Set of geophysical study methods for hard mining waste landfills ......................................................................................... 114

Mining machinery and equipment

Medvedev A.A., Poserenin A.I., Romanov V.V. Microelement analysis of oils using plants based on high-energy nuclide neutron sources ............................................. 121
Pobegaylo P.A., Ilyina A.N. Baselines of the procedure for estimating velocity and acceleration of single-bucket hydraulic excavator attachments at early design stages ...... 129
Haba Etienne, Timiryazev V.A. Application of additive technologies in manufacture of machine parts ........................................................................................................ 136
Shahtorin I.O. Selection and validation of small-diameter DTH air hammers .................. 145

Enrichment of minerals

Lvov E.S. Features of disintegration of lumpy geomaterials in crushing under dynamic effects ......................................................................................................................... 154
Matveev A.I., Osipov Yu.A., Popova K.S. The need to up-grade coal from the Lena Basin in the Republic of Sakha (Yakutia) ................................................................. 161
Matveev I.A., Matveev A.I., Eremeeva N.G., Grigorev Yu.M. Experimental and theoretical investigation of the behavior of particles in water flow .................................. 171
Salomatova S.I. Research findings on final scavenging of gold-bearing concentrates ........ 186
Shirman G.V. Effect of freezing–thawing cycles on disintegration of moist clay aggregates ...................................................................................................................... 192

Production organization and management in mining
Rakhimbekov S.M. Mining-and-technical object database ............................................. 199
Shulyatieva L.I. Efficiency evaluation methodology for difficult coal deposits .............. 207

Fire and industrial safety in mining
Balovtsev S.V. Explosion safety procedure for working areas in coal mines .................. 218
Savon D.Yu. Modern approaches to production safety in coal mining ............................ 227

Special editions GIAB
Azev V.A. Methodology of integrated planning for development of coal enterprises .......... 38
Galkin V.I., Tenyakov A.N. Substantiation of operational and design parameters of belt conveyors with spatial curvilinear route ................................................................. 45
Rudakov M.L., Stepanov I.S. Evaluation of a sphere of application of integral indicators of heat load in the workings of oil mines ..................................................... 106
Agafonov V.V., Osharov A.V., Zakharov S.I. Reorganization as a key factor of technical-and-economic intensification of open pit coal mine ........................................ 160
Ul’rikh D.V. Use of natural sorbents in the purification technologies of surface runoff from the territories of mining and processing enterprises ............................... 191
Mel’nik V.V., Sukharkov I.N., Khazhiev V.A. Competitive ability of maintenance service to ensure mining and transport equipment operability ..................................... 198
Yushina T.I., Valavin V.S., Krylov I.O., etc. Quantitative assessment of environmental damage to the environment from stale waste from enrichment of brown ore of the Kerch basin .............................................................................................................. 206
Goryachev V.I., Mikheev I.I., Yablonev A.L., etc. Peat extraction and processing technologies, peat equipment and its repair ....................................................... 217
Shadyzheva E.B. Application of wear-resistant materials for protection of working surfaces of mining equipment .................................................................................. 235

The deposited manuscripts
Khakulov V.A., Shapovalov V.A., Shogenova Z.A. Technology of forming the quality of inert materials in unloading zones of floodplains of rivers for conditions of automated lump sorting ............................................................. 17
Androsov A.D., Sivtseva A.I., Petrova L.V. The experience of scientific research in the effective development of difficult to access reserves of diamond ore in cryolitho-zone .......................................................... 145
