Development of mineral deposits

Kaplunov D.R., Yukov V.A. Application field of combined technologies of copper deposits underground mining	5
Kulak V.Yu., Voloshin V.A., Frianov V.N. Evaluation of influence exerted by coal exploration quality on mine planning efficiency	13
Tarasov V.V., Pestrikova V.S. Review of shaft excavation accidents at upper Kama potash deposit	23
Ol'khovikov Yu.P., Pestrikova V.S., Tarasov V.V. Features of maintaining shaft support installed in carnallite rocks of Verkhnekamskoye deposit in safe condition	30
Tsibaev S.S., Kalinin S.I., Renev S.S., Zorkov D.V. Evaluation of the effect of flood on surrounding massif and bolting state	35
Eremin G.M. Validation of choice of efficient no-failure dumping technologies for open pit mines, considering environmental standards	44
Ermiyash D.M., Pukhova O.V. Assessment of technological parameters of peat extraction during peatland development	51
Kozyrev A.A., Zhukova S.A., Samsonov A.V., Volkov A.V. Methodical principles of natural factors recording when estimating mining-induced seismicity at the Khibiny rock massif	56
Godovnikov N.A., Dunaev V.A. , A probabilistic method of predicting potential deformations of the ledges in solid rock	81
Zakharov E.V., Kurilko A.S., Popov V.I. The alternating temperature effects as a factor for energy saving technologies of complex preparation of raw materials in permafrost conditions	84
Ivanov V.A., Stolbikova G.E., Gorelova S.E. Impact of initial moisture content and time of drying on milled peat harvesting	92
Kasparyan E.V., Fedotova Yu.V. Stress-strain state in rock mass of the khibiny deposits and tasks of geomechanical zoning	97
Larin N.S. Management of technical and economic indicators quarries of building stone based on an analog method for estimating costs	108
Lavrenko S.A., Trufanova I.S. Experimental studies of cambrian clay cutting tool	113
Zhukov A.A., Prigara A.M., Pushkareva I.Yu., Tsarev R.I. Experience of applying the complex of geophysical methods to detect karst cavities in the dumps of potash mines	120
Kuporova A.V., Boltushkin A.N. The use of refinery waste to improve the quality of the molded peat	131
Kholodnyakov D.G., Argimbayev K.R., Vu Tuan, Startseva K.A. Losses and contaminations of minerals at open-cast mining	135
Holodnyakov G.A., Obozhin A.A. Determination of partially fulfilled complex deposits with rated operational mining ratio	140
Yakubovskiy M.M., Argimbaev K.R. Method of determination of raw materials' amount on a bulk stockyard	143

Enrichment of minerals

Krasnov G.D., Shekhirev D.V., Barnov N.G., Chesnokov A.A., Chikhladze V.V. Influence of the method of crushing on the selectivity magnetic separation polymetallic ore	150
---	-----

Sekisov A.G., Myazin V.P., Lavrov A.Yu., Popova G.Yu. Possibilities of gold heap leaching from refractory ores and technogenic raw materials with the help of photoelectrochemical synthesis of active reagent complexes in process solutions.....	155
Sekisov A.G., Lavrov A.Yu., Myazin V.P., Popova G.Yu., Milyukina A.I. Analysis of photoelectrochemical gold heap leaching from ore mass of used leach heaps and refractory ores of Pogromnoe deposit.....	159
Sekisov A.G., Rubtsov Yu.I., Lavrov A.Yu., Popova G.Yu., Shevchenko Yu.S. Analysis of photoelectrochemical gold heap leaching from ore mass of used leach heaps and refractory ores of Pogromnoe deposit	163

Measuring, control, diagnostics

Mukhamedgalieva A.F., Bondar A.M., Kreinin S.M., Laptev V.B., Novikova N.N., Trofimov N.S., Shvedov I.M. Microstructure and spectroscopic study of periodic micro- and nano-structures that occur on the surface of amorphous and crystalline silica under resonance radiation CO ₂ -laser.....	173
Khachay O.Yu. Electromagnetic monitoring data interpretation algorithm in the framework of two-rank hierarchy model of rock mass.....	180

Mining cars, the equipment and transport

Alekseeva L.B., Uvarov V.P. Stable motion of rigid rotor on antivibration supports with slider bearers.....	188
Busygin A.M. Drill rig operation automation	192
Verzhanskii P.M., Maslov M.I. Study on the energy of vibration impact of the end-effector to the rock's face cutting	195
Gracheva N.Yu. Development of the laboratory stand on the basis of vibratory mill for the experimental determination of its operating parameters	202
Pobegailo P.A. Evolution of the design of the domestic excavators in the second half of the XX century	208
Pobegailo P.A. Working equipment hydraulic excavators: research of geometrical properties	212

Automation and information systems

Gerasimov V.S., Shek V.M. Intellectualization gis decision support systems.....	226
Ilyushin Yu.V., Trushnikov V.E. Multithreading analysis of seismic data using computer technology	230
Lavrenko S.A., Trufanova I.S. Theoretical studies of mass destruction cambrian clay cutting in the computer environment ansys	236
Ulyanov V.G., Vishnevskii A.A., Pakhomov N.E. Development of an automated system of optimum fleet management agreed on the X-ray separators almazoizvlekatelnoy factory.....	245

Aerology, methane, safety

Kolikov K.S., Mazina I.E., Uruzbieva A.G. Stowing as a way to reduce the negative environmental impact during underground coal mining.....	252
---	-----

Economics and management
