## Geomechanics, Rock failure

<i>Oparin V.N., Potapov V.P., Kiryaeva T.A., Yushkin V.F.</i> Development of methods and means for integrated geo-information-based analysis of influence exerted by nonlinear deformation and wave processes induced by seismic forces on geomechanical behavior of pit walls and on gas-dynamic activity in coal mines in Kuzbass.....	5
<i>Rakishev B.R., Rakisheva Z.B., Orynbay A.A.</i> Computer-aided creation of coordinate grid for blasted rock block .....	40
<i>Aliev M.M., Ismagilova Z.F., Burmistrova N.N.</i> Geomechanical models of shear fracture of multi-layer rocks .....	52
<i>Viktorov S.D., Zakalinsky V.M., Shipovskii I.E., Mingazov R.Ya.</i> Effect of blasting pattern design on rock mass stability in mineral mining.....	62
<i>Efremovtsev N.N., Trofimov V.A., Shipovskii I.E.</i> Strain concentration in wave field generated by blasting in elongated boreholes.....	73
<i>Meskhi B.Ch., Pleshko M.S., Voinov I.V., Caixao J.J.Z.</i> Safe operation of transportation tunnels based on predictive modeling of active geomechanical processes.....	86

## Geotechnology

<i>Volkov M.A., Grinyuk A.P., Murko V.I., etc.</i> Preparation of grouts using ash and slag from combustion of coal–water slurry fuel .....	97
<i>Qiao Jianyong, Wang Zhiqiang, Zhao Jingli</i> The evolution of thick coal seams mining methods in China.....	105

## Mine aerogas dynamics, Mining thermophysics

<i>Kaimonov M.V., Kiselev V.V.</i> Designs, technologies and temperature conditions of frozen structures in placer mines in the North.....	118
--------------------------------------------------------------------------------------------------------------------------------------------	-----

## Mining machinery

<i>Butko A.O., Kuznetsov P.M., Khoroshko L.L.</i> Creating a digital twin of crushing and milling equipment reconditioning process.....	130
-----------------------------------------------------------------------------------------------------------------------------------------	-----

## Geocology

<i>Gushchina T.O., Silyutin S.A., Sokolovskaya E.E., Epshtein S.A.</i> Wastes from coal mining and processing. Methodological approaches to the assessment of their ecological safety and directions for use. Part 3. Development and validation of test procedure to determine macro- and micro-elements contents in coal mining, processing and combustion wastes.....	145
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

## Geoinformatics

<i>Sirotnina N.A., Kopoteva A.V., Zatonskiy A.V.</i> Contribution of mining industry to natural resource capacity of a region.....	163
------------------------------------------------------------------------------------------------------------------------------------	-----

## The deposited manuscripts

<i>Karpenko S.M., Mukhina E.M.</i> Correlation-regression and predictive modeling of power consumption in road transport companies .....	39
<i>Isaldinov I.N.</i> Frequency-controlled electric drive for mobile mine tunnelling machine.....	129
<i>Abdullaev U.G.</i> Justification for the use of a frequency-controlled electric drive of a submersible pump in underground leaching of minerals.....	162
<i>Abdullaev U.G.</i> Visual modeling in MatLab environment of a frequency-controlled electric drive of a pumping unit for various control systems.....	178
