

CONTENT

Modern explosive technologies

Moldovan D. V., Chernobay V. I., Sokolov S. T., Bazhenova A. V. Design concepts for explosion products locking in chamber5

Dolzhikov V. V., Ryadinsky D. E., Yakovlev A. A. Influence of deceleration intervals on the amplitudes of stress waves during the explosion of a system of borehole charges18

Mining geomechanics, soil mechanics and surveying

Belyakov N. A., Belikov A. A. Prediction of the integrity of the water-protective stratum at the Verkhnekamskoye potash ore deposit33

Verbilo P. E., Vilner M. A. Study of the jointed rock mass uniaxial compression strength anisotropy and scale effect47

Verbilo P. E., Iovlev G. A., Petrov N. E., Pavlenko G. D. Application of information modeling technologies for surveying support of mining operations60

Morozov K. V., Demekhin D. N., Bakhtin E. V. Multicomponent strain gauges for assessing the stress-strain state of a rock mass80

Lebedev M. O., Stepukov E. V., Larionov R. I. Stress-and-strain statement of the travolator metro tunnel lining in course of construction and operation98

Industrial safety and labor protection at mining enterprises

Kornev A. V., Ledyayev N. V., Kabanov E. I., Korneva M. V. Estimation of predictive dust content in the faces of coal mines taking into account the peculiarities of the wettability of coal dust 115

Meshkov A. A., Ledyayev N. V., Khamutsky A. A., Savchenko A. V., Bizyaev A. A. Improvement of the method registration electromagnetic radiation preceded to rock failure135

Complex and deep processing of mineral raw materials

Aleksandrova T. N., Nikolaeva N. V., Artamonov I. S. Optimisation of fuel briquettes composition 149

Afanasova A. V., Aburova V. A., Prokhorova E. O., Lushina E. A. Investigation of the influence of depressors on flotation-active rock-forming minerals in sulphide gold-bearing ore flotation161

Yakovleva T. A., Romashev A. O., Mashevsky G. N. Digital technologies for optimizing the dosing of flotation reagents during flotation of non-ferrous metal ores175

Innovations and prospects for the development of mining engineering and electromechanics

Bolobov V. I., Akhmerov E. V., Rakitin I. V. Influence of rock type on regularities of excavator bucket tooth crown wear189

Gabov V. V., Zadkov D. A., Nguyen Van Xuan, Hamitov M. S., Molchanov V. V. To the problem of improvement the working tools of mining excavation machines205

Knyazkina V. I., Ivanov S. L. Improvement of the system of maintenance and repair of mining machines according to the actual state223

Makharatkin P. N., Abdulaev E. K., Vishnyakov G. Yu., Botyan E. Yu., Pushkarev A. E. Increase of efficiency of dump trucks functioning on the basis of justification of their rational speed by means of simulation modeling237

Jungmeister D. A., Gasimov E. E., Isaev A. I. Substantiation of the design and parameters of the device for regulating the air flow in down-the-hole hammers of roller-cone drilling rigs251

Assessment and reduction of the technogenic impact of mining on the environment

Beloglazov I. I., Sabinin D. S., Nikolaev M. Yu. Modeling the disintegration process for ball mills using dem268

Digital transformation of mining production

Vyboldin Yu. K. Application of wireless network technologies in the construction of seismic exploration systems.....283

Organization of production and management in mining

Kulikova E. Yu., Konyukhov D. S., Potokina A. M., Ustinov D. V. Analytical method for calculating the coefficient of technological soil sampling in the organization of mining and construction works with the use of mechanized tunneling305
