

CONTENT

Geotechnology

| | |
|---|---|
| <i>Valiev N.G., Golik V.I., Lebzin M.S.</i> Inertness of influence exerted by effluents of Tyrnyauz Tungsten–Molybdenum Plant on hydrological systems of the North Caucasus | 5 |
|---|---|

Geomechanics, Rock failure

| | |
|---|----|
| <i>Afanasev P.I., Pavlovich A.A., Melnikov N.Ya., Nikolaev R.V.</i> Features of seismic explosive wave propagation in hard adjacent rock mass | 17 |
| <i>Protosenya A.G., Veselova A.V.</i> Assessment of karst cave influence on ore body stability during development of Western Yakutia deposits..... | 33 |

Mine aerogasdynamics, Mining thermophysics

| | |
|---|----|
| <i>Vasilenko T.A., Kirillov A.K., Islamov A.Kh., Doroshkevich A.S., Novikova V.N.</i> Forecast of dynamic phenomena in coal mines with regard to hierarchical structure of rock mass and sorption properties of coals | 47 |
|---|----|

Geocology

| | |
|--|----|
| <i>Konovalov V.E., Pochechun V.A., Semyachkov A.I., Kurbanov I.K.</i> Role of physicochemical and migration processes at Gumeshevsky copper mine in groundwater self-purification..... | 69 |
|--|----|

Mining industrial geology, Mining geophysics

| | |
|--|----|
| <i>Tagiltsev S.N., Tsurkan E.P., Kibanova T.N., Surganov S.V.</i> Analysis of lineal features for assessing orientation of tectonic stresses and types of faults in geological environment of the South Ural | 81 |
|--|----|

Mining machinery

| | |
|---|-----|
| <i>Zasypkina S.A., Pashko A.D.</i> Stress–strain analysis of bucket blade of underground mining LHD loader..... | 92 |
| <i>Kopachev V.F., Kopacheva E.A.</i> Effect of transient processes on technical performance of compressed air production and handling systems in mines..... | 106 |
| <i>Shestakov V.S., Lagunova Yu.A., Ibraeva N.R.</i> Simulation of operation of fine crushing cone crusher..... | 120 |

Enrichment of minerals

| | |
|--|-----|
| <i>Egoshina O.S., Aleksandrov B.M.</i> Integrated assessment of peat deposit using digital database and coding peat categories with regard to quality requirements | 134 |
| <i>Kozin V.Z., Komlev A.S.</i> Compatibility of discrete and continuous sampling in sampling theory..... | 145 |
| <i>Leonov R.E., Patrakov S.S.</i> Determination of a kiln model during normal operation | 155 |
| <i>Nurkhozhayev E.S., Makarov V.N., Akhmetov R.G., Makarov N.V.</i> Topological optimization of shaft kiln parameters by ecological efficiency criterion..... | 165 |

Geoinformatics

| | |
|--|-----|
| <i>Nkrumah A.H.M., Silina T.S., Faizrakhmanov R.A.</i> Neural network model for predictive mapping of endogenous gold deposits | 178 |
|--|-----|

Technosphere safety in mining industry

| | |
|---|-----|
| Rybnikov P.A., Rybnikova L.S. Fluid flow modeling to determine water balance in catchments during coal mine closure..... | 193 |
| Tsybin E.F., Efremova T.A., Ovchinnikova T.Yu. The influence of X-ray fluorescence separation algorithm on the effectiveness of pre-concentration of copper-zinc ore | 208 |
| Shtang A.A., Dedov S.I., Gripas V.K. Integration of convolutional neural network into a chromatographic gas analyzer for continuous screening | 221 |

Production organization and management in mining

| | |
|---|-----|
| Ablaev R.B. Planning performance of stoping operations with regard to their complexity: A case-study of Oktyabrsky Mine, Buribaevsky GOK | 234 |
|---|-----|
